BEFORE THE DIVISION OF OIL, GAS AND MINING  
DEPARTMENT OF NATURAL RESOURCES  
STATE OF UTAH

---ooOoo---

IN THE MATTER OF TENTATIVE	:	
DECISION TO APPROVE A LARGE	:	NOTICE OF TENTATIVE
MINING AND RECLAMATION PLAN	:	DECISION TO APPROVE
FOR SHAW ENVIRONEMTAL, INC.,	:	
LIME PEAK QUARRY,	:	NO. M/049/047
UTAH COUNTY, UTAH	:	

---ooOoo---

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF PRODUCTION,  
MINERAL AND ROYALTY OWNERS, AND PARTICULARLY ALL PERSONS  
INTERESTED IN SECTIONS 4, 5 AND 8, TOWNSHIP 10 SOUTH, RANGE 2 WEST, SLBM,  
UTAH COUNTY, UTAH.

Notice is hereby given by the Division of Oil, Gas and Mining of its tentative decision to approve the Large Mining Operations Notice of Intention for Shaw Environmental's Lime Peak Quarry. Mining activities will affect the following areas: portions of: the west 1/2 of the southwest 1/4 of section 4; the east 1/2 of the southeast 1/4 of the southeast 1/4 of section 5; and the northeast 1/4 of the northeast 1/4, the northwest 1/4 of the southeast 1/4 of the northeast 1/4, the northeast 1/4 of the southwest 1/4 of the northeast 1/4, and the east 1/2 of the northwest 1/4 of the northeast 1/4 of section 8; Township 10 South, Range 2 West, SLBM, Utah County, Utah

Shaw Environmental Inc. has submitted a permit application to combine four existing small mining projects into one large mining operation, with additional area for future use. Reclamation surety will be provided to the Division for the proposed project disturbance. The operator will employ the following mining and reclamation techniques on approximately 24.7 acres of private land (some of which was disturbed historically).

**During Operations:** No permanent facilities are associated with this operation. Temporary structures include a 500-gallon fuel tank, a crusher and stacking facility. Prior to new disturbances, available soils will be salvaged for reclamation. No topsoil is available on the old quarry area in section 4. Stone is blasted and excavated from the quarry area and hauled to the processing area. Here it will be crushed and screened and stockpiled. Final product will be hauled by truck to various superfund mitigation areas in the Eureka area. Fugitive dust will be controlled by application of magnesium chloride and water. The operator has an Air Quality Approval Order for operation of the crusher.

**After Operations:** The quarry area will be left with an overall slope of 45 degrees (1h:1v). Because the pre-existing operation did not salvage soil materials, no soil will be

CERTIFICATE OF MAILING
